

C5 RF Installation

- Please check out this instruction first to know how to mix soapy solution and applying vinyl:
http://www.vettestripes.com/Vette%20Instruction/How_To_Peel_Off_Stripes.pdf
- Install the big stripes first following the picture below for correct stripes placements. You will need to install the piece right next to the headlight first which the top corner 6" away from the lamp opening. The other piece is 1 5/16" away from the first piece. When installing big main stripes, line them up parallel with the fender line evenly. They are about 1 1/32" from the fender line.
- Install the border pieces after all main pieces got laid down perfectly.
- Wait couple hrs and peel off the masking tape at 180 degrees angle.
