

C6 Wheel Enhancements

- Your C6 wheel enhancements will come with a set for 4 wheels (two 18's and two 19's) and 4 extra pieces in case you make a mistake during installation or unluckily got rock chip down the road. They're all got ultra clear premasked.
- There are 2 way to apply the decals: dried application and wet application. Using a scissor to cut them separately.
- For dried application, peel the decal off the backing paper, apply it, and peel off the premasked tape.
- For wet application (suggested method): Mix a quart of water with 7-8 drops of baby shampoo in a spray bottle. Spray soapy solution on the wheel spoke that you about to apply. Peel the decal off the backing paper, spray soapy solution on the adhesive side. Apply the decal to the wheel, align it, and squeeze all the water out. Wait at least 3-4 hrs to peel off the premasked tape.
- There are 2 circles around the wheel lugs: inner ones and outer ones. The decal will sit next to the outer circles and center thru out the spokes.
