

# C6 RF grand sport fender stripes

- Please check out this YouTube video to know how to install the stripes: <https://youtu.be/ehilr0iDMlk>. It is for C5's but the same concept for C6's.
- Please check 2 pictures below for stripes placement for standard C6's and C6 Z06/Grand Sport.
- When installing pinstripes, DO NOT peel off the masking tape until finish installation. Check this instruction to install stripes with premask: <http://www.vettestripes.com/wp-content/uploads/2018/10/Install-Stripes-With-Premask.pdf>
- If your pinstripes are a bit short (which most of the time they should be), then just peel off the clear premask a little bit. When peeling premask off, it will stretch your pinstripes to make it long enough. Do not peel off too much and will stretch it longer. Peel a bit and test fit, etc ...
- If your pinstripes are longer (which somehow you stretch it since we don't intent to make it longer), then pretty much you are doomed 😊 and will need to trim it. This is less than 1% happening!

## Regular C6's
