

# C7 Twilight Stripes Instruction

. Please read the "MUST READ" instruction here to know how to mix soapy solution and more: <https://www.vettestripes.com/c7-instruction/> if you do wet installation and how to install stripes with premask here: <https://www.vettestripes.com/wp-content/uploads/2018/10/Install-Stripes-With-Premask.pdf>

. These stripes can also be installed dry since they are wrap vinyl.

. Your stripes will come with 3 colors in 3 separated pieces: center, driver side, and passenger side stripes.

. Center stripes will come with removable spacers on both sides with "X" marks.

. All stripes will come with clear masking tape on top.

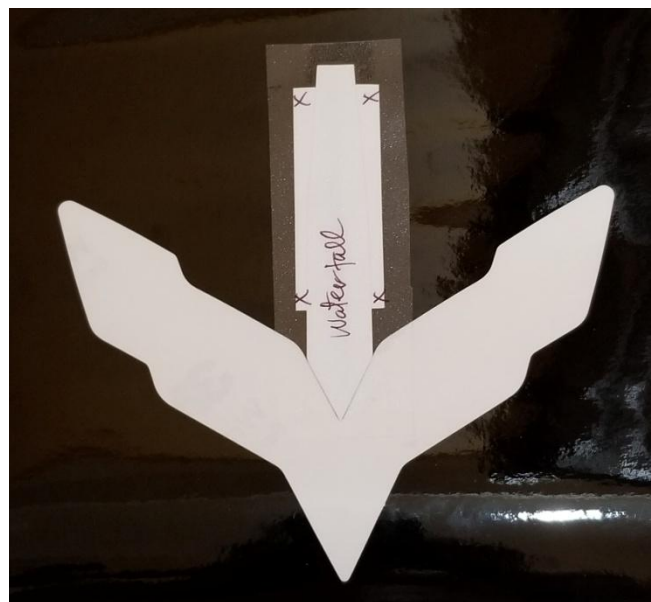

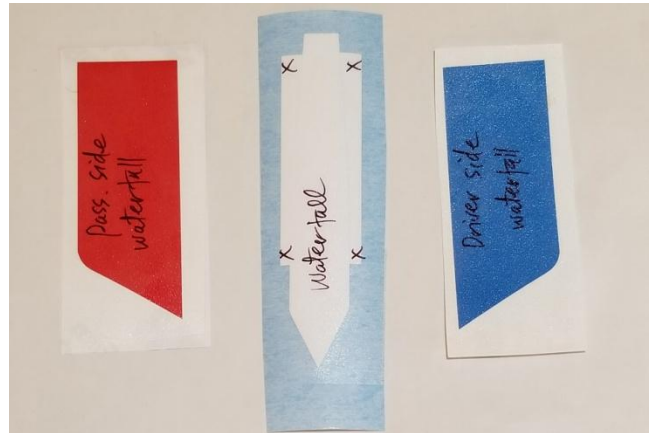

. All stripes are cut longer than each panel so you can wrap around them.

. Let assume the black piece with emblem cutout is the front nose or your convertible waterfall.

. Install all the center stripes first at the middle of you c7 Corvettes.

. You will need to remove the hood vents to have factory looking installation stripes. With the hood vents removed, you can wrap your stripes around both ends.

. Install all center stripes first. Install stripes next to the emblems first (front nose, back rear bumper, etc ...)

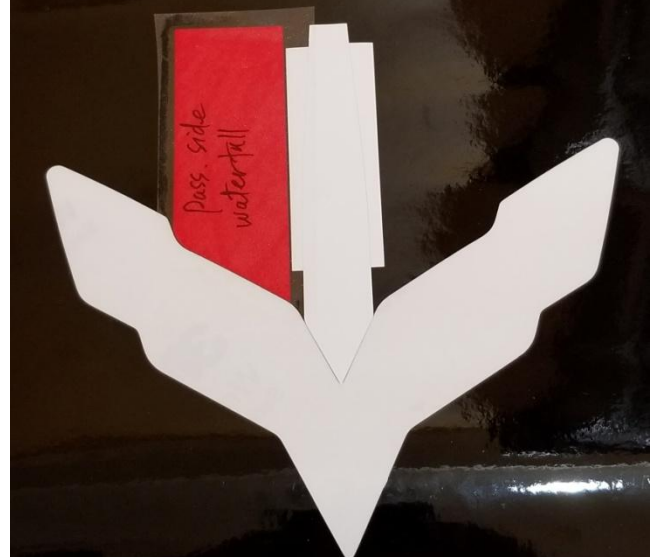

# C7 Twilight Stripes Instruction (cont.)

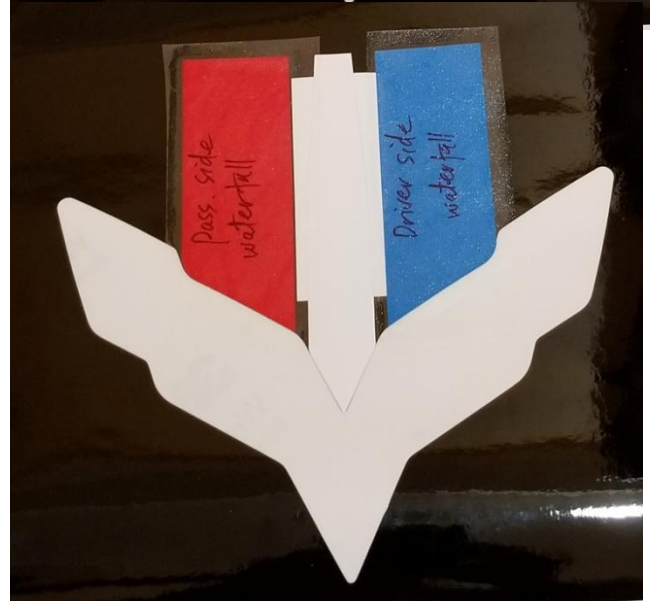

. After install all center stripes, remove clear masking tape.

. Install passenger side stripes right next to the spacers of the center stripes.

. Install driver side stripes right next to the spacers of the center stripes.

# C7 Twilight Stripes Instruction (cont.)

- . Remove clear masking for both driver and passenger side stripes

- . Remove the spacers between center and both side stripes.
- . You will have the final looking stripes
- . Wrap them around all the panels.
